Advisor Notes:

The Behavioral Science Associate of Arts degree is an academic transfer program designed to introduce students to the fields of Psychology, Sociology, and Anthropology. The course of study provides students with the general education courses consistent with those required of freshmen and sophomores in four-year universities, and also provides an introduction to the various career fields within Psychology, Sociology, and Anthropology. Maximum transferability to a four-year degree program in Psychology, Sociology, or Anthropology can best be assured when students carefully coordinate their Associate of Arts degree work with the general education requirements of the four-year institution to which they plan to transfer.

In order to increase chances of success in more advanced courses, it is **strongly recommended** that students complete the **Core 4** in the first two semesters. Choices in the *General Education Courses* can be added to reach semester requirements. All *Program Requirements* should be taken after the General Education courses have been completed.

- All students must take the University Skills Placement Text prior to beginning this program.
- Student must have an ENMU Campus System cumulative GPA of 2.00 in order to meet graduation requirements.
- All lectures and corresponding labs must be taken simultaneously.
- Student should submit a Graduation Application before the close of the semester preceding the expected completion date.

Courses only offered once a year are identified at the end of the course title with the following designations: F = fall only; S = spring only. Course enrollment may determine whether or not a course will be offered.
